Be sure to read and understand all of these instructions before using the machine. Use common sense for operating any electrical appliance and whenever using your machine. Also, follow all warnings and instructions marked on the machine and in the accompanying literature. After reading this section, keep it in a safe place for future reference.If the machine produces an odd smell, immediately turn off the power switch and unplug the machine. • This could result in electric shock or fire. Caution During an electrical storm or for a period of non-operation, remove the power plug from the electrical outlet. • This could result in electric shock or fire. If the plug does not easily enter the electrical outlet, do not attempt to force it in.INSTALLATION / MOVING Warning Do not place the machine in an area with dust, humidity or water leaks. • This could result in electric shock or fire. Caution Before moving the machine, turn the power off and disconnect all cords. Then lift the machine: • If the machine weighs under 20 kg (44.09lb), lift with 1 person. • If the machine weighs between 20 kg (44.09lb) and 40 kg (88.18lb), lift with 2 people. • If the machine weighs more than 40 kg (88.18lb), lift with 4 or more people.When you are working inside the machine replacing supplies or cleaning the inside, do not operate the machine. • You could get injured. Do not disassemble, repair or rebuild the machine by yourself. • It can damage the machine. Call a certified technician when the machine needs repair. Keep the power cable and the contact surface of the plug clean from dust or water. • Otherwise, this could result in electric shock or fire.regulatory information This machine is designed for a normal work environment and certified with several regulatory statements. LASER SAFETY STATEMENT The printer is certified in the U.S. to conform to the requirements of DHHS 21 CFR, chapter 1 Subchapter J for Class I(1) laser products, and elsewhere is certified as a Class I laser product conforming to the requirements of IEC 60825-1:1993 + A1:1997 + A2:2001. Class I laser products are not considered to be hazardous.POWER SAVE This printer contains advanced energy conservation technology that reduces power consumption when it is not in active use. When the printer does not receive data for an extended period of time, power consumption is automatically lowered. ENERGY STAR and the ENERGY STAR mark are registered U.S. marks. For more information on the ENERGY STAR program see . RECYCLING Recycle or dispose of the packaging material for this product in an environmentally responsible manner.• • • • • Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or experienced radio TV technician for help. Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.RUSSIA ONLY REPLACING THE FITTED PLUG (FOR UK ONLY) Important The mains lead for this machine is fitted with a standard (BS 1363) 13 amp plug and has a 13 amp fuse. When you change or examine the fuse, you must re-fit the correct 13 amp fuse. You then need to replace the fuse cover. If you have lost the fuse cover, do not use the plug until you have another fuse cover. Contact the people from you purchased the machine. The 13 amp plug is the most widely used type in the UK and should be suitable.EC Certification Certification to 1999/5/EC Radio Equipment & Telecommunications Terminal Equipment Directive (FAX) This Samsung product has been self-certified by Samsung for pan-European single terminal connection to the analogue public switched telephone network (PSTN) in accordance with Directive 1999/5/EC. The product has been designed to work with the national PSTNs and compatible PBXs of the European countries: In the event of problems, you should contact the Euro QA Lab of Samsung Electronics Co.In environments where the risk of interference to other devices is harmful or perceived to pose a wireless device may be restricted or eliminated by an operator. Airports, Hospitals, and Oxygen or flammable gas laden atmospheres are limited examples where use of wireless devices may be restricted or eliminated. When in environments where you are uncertain of the sanction to use wireless devices, ask the applicable authority for authorization prior to use or turning on the wireless device.3. After searching the wireless network, a list of wireless network your machine has searched appears.from your computer. In an office environment, we recommend that you contact a network administrator to set this address for you. IP setting using SetIP Program (Windows) This program is for manually setting the network IP address of your machine using its MAC address to communicate with the machine. A MAC address is the hardware serial number of the network interface and can be found in the Network Configuration Report 1. Check whether the network cable is connected to the machine. If not, connect the machine with a standard network cable. 2.Wireless setting using the network machine, such as Internet Explorer, Safari or Firefox and enter your machine's new IP address in the browser window. For example, 3. Click Login on the upper right of the SyncThru™ Web Service website. The Login window appears. 4. Type in the ID and Password then click Login.Solving wireless network problems If problems occur while using the machine on a network, check the following. For information on access point (or wireless router), refer to its own user's guide. • • • • • Your computer, access point or machine may not be turned on. Check the wireless reception around the machine. If the reception is far from the machine or there is an obstacle, you might have difficulty receiving the signal.basic setup 4. After installation is complete, you may want to set the machine's default settings. Refer to the next section if you would like to set or change the values. This chapter explains how to set the machine's default settings. ALTITUDE ADJUSTMENT From your computer The printer print quality is affected by atmospheric pressure, which is determined by the height of the machine above sea level.3. 4. 5. Select Printer, and click the machine name you want to use. 6. Select Properties that you want (source, type and paper) in the Print window. USING HELP Click the question mark on the upper-right corner of the window and click on the topic you want to know about. Then a pop-up window appears with information about that feature's which is provided from the driver. If you have stored the overlay file you want to use in an external source, you can also load the file when you access the Open window. After you select the file, click OK. The Open button appears. The Open button is the Overlay List box and is available for printing. Select from the Overlay List box. 6.CHANGING THE DEFAULT PRINT SETTINGS 1. Check the Print to file box at the Print window. Most Windows applications will override settings you specify in the printer driver. Change all print settings available to the application first, and change any remaining settings using the printer driver. 1. Click the Windows Start menu. 2. For Windows 2000, select Settings > Printers. • For Windows XP/Server 2003, select Printers and Faxes.Changing printer settings Printer Settings You can use advanced printing features provided by your machine. Open the application printing document you want to print. Select Print from the File menu. The machine name, which appears in the printer properties window may differ depending on the machine in use. Except for the name, the composition of the printer properties window may differ. 1. Open the document that you want to print. 2. Select Print from the File menu. 3. Select the your machine from the Select Printer list.From the LPR GUI window, select the model name of your machine from the printer list and click Properties. Printing files You can print many different types of files on your machine using the standard CUPS way, directly from the command line interface. The CUPS LPR utility allows you to do that. But drivers package replaces the standard LPR tool by a much more user-friendly LPR GUI program. To print any document file: 1. Type lpr from the Linux shell command line and press Enter.copying 8. This chapter gives you step-by-step instructions for copying documents. This chapter includes: • • • • • • Basic copying Changing the settings for each copy • When printing a document, select the print properties menu, click CK or Print in the Print window. USING HELP Click the question mark on the upper-right corner of the window and click on the topic you want to know about. Then a pop-up window appears with information about that feature's which is.2. ID CARD COPYING Your machine can print 2-sided originals on one sheet. The machine prints one side of the original on the upper half of the paper and the other side on the lower half without reducing the size of the original. This feature is helpful for copying a small-sized item such as business card. 2.scanning 9. Scanning with your machine lets you turn pictures and text into digital files that can be stored on your computer. This chapter explains the procedure of scanning and the various way to scan your. This chapter includes: • • • • Basic scanning method Scanning from an image editing program TWAIN-enabled software When scanning a fluorescent color, due to the property of the scanner, the result my differ from the original.Set Scan Button tab - Scan Destination • • • Available Destination List: Shows the list of applications currently linked to scanned images in the PC's registry. Select the program you want to use and click the right arrow and add to Front Panel Destination List. Front Panel Destination List: Shows the list of applications to open scanned image. You can choose only one application of scanned. 3. Add to Available Destination List.SCANNING USING THE WIA DRIVER Your machine also supports the Windows Image Acquisition (WIA) driver for scanning images. WIA is one of the standard components provided by Microsoft Windows XP and works with digital cameras and scanners. Unlike the TWAIN driver, the WIA driver allows you to scan and easily adjust images without using additional software. • The WIA driver works only on Windows XP/Vista/7 with a USB port. • Depending on the supported Control Panel view, the path may differ. 3.in Bonjour Devices. If you want to scan using TWAIN, refer to the Mac OS X 10.4 steps above. 6. Set the scan options on this program. 7. Scan and save your scanned image. • • • • For Mac OS X 10.3, use TWAIN-compliant software such as Adobe Photoshop. Scan process differ according to TWAIN-compliant software. To save a new Job Type setting 1. 2. 3. 4. TOOLS Change the options from the Scanner Properties window. Click Save as. Enter the name for your setting. Click OK. Your setting is added to the Saved Settings drop-down list. NAME FUNCTION Save Saves the settings. Undo Cancels your last action. Redo Restores the action you canceled. Scroll Allows you to scroll through the image.Zoom In Zooms the image in management tools 10. This chapter introduces management tools provided to help you make full use of your machine. This chapter includes: • • • • Introducing useful management tools Using SyncThru™ Web Service (SCX-3205W(K) only) Using the Smart Panel program Supported optional devices and features differ according to your model. Check your model name (See "Features by Models" on page 03).Maintenance tab This tab allows you to maintain your machine by upgrading firmware for sending mails. You can also change how your machine behaves. • • • Firmware Upgrade: You can upgrade your machine's firmware. • Contact Information: You can view the machine's information. • Link: You can view the links to useful sites where you can download or check firmware. • 3. Double-click the SmarThru icon. E-mail: Scanning an image and emailing it. Allows you to scan an image and save it to an application or folder, email it or publish it on a website.• • • • Scan to: Allows you to scan an image and save the application. • email, you must have a mail client program, like Outlook Express, which has been set up with your e-mail account. 4. Configuration To use on the screen help, click Help. 3.Scanners configuration In this window, you can monitor the activity of scanner devices, view a list of installed Samsung machine devices, change device properties, and scan images. 3. • Shows the port type, connection to the port, and status. Refresh: Renews the available ports. Release port: Releases the selected port. Sharing Ports Between Printers and Scanners Your machine may be connected to a host computer via a parallel port or USB port maintenance 11. This chapter provides information about maintaining your machine and the toner cartridge. This chapter includes: • • • MAINTENANCE REPORT You can print a configuration page to view current printer settings, or to help troubleshoot printer problems. Stop/Clear button for about two seconds, In ready mode, press and hold the release the button when imaging out. Use the handle on the cartridge to avoid touching this area. 5. With a dry and lint-free cloth, wipe away any dust and spilled toner from the toner cartridges area. 1. Slightly dampen a soft, lint-free cloth or paper towel with water. 2. Open the scanner lid. 3. Wipe the surface of the scanner glass until it is clean and dry.• Dusty places. A car for a long period of time. An environment where corrosive gases are present. An environment with salty air. Handling instructions • • Do not touch the surface of the photoconductive drum in the cartridge. Do not expose the cartridge to unnecessary vibrations or shock. Never manually rotate the drum, especially in the reverse direction; this can cause internal damage and toner spillage.troubleshooting 12. This chapter gives helpful information for what to do if you encounter an error. This chapter includes: • • • Redistributing toner Tips for avoiding paper jams • REDISTRIBUTING TONER Clearing paper jams Solving other problems 3. Pull the toner cartridge out. Solving other problems is near the end of its life. The Status LED blinks red.In the tray (once place completely. Click this link to open an animation about clearing a jam. 1. Open the scan unit first, and then the inner cover, the toner can be avoided.3. Remove the jammed paper by gently pulling it straight out. 2. Close the inner cover. The jammed paper is automatically ejected from the machine. If the paper does not move when you pull, or if you do not see the paper in this area, check inside the machine (See "Inside the machine" on page 79). 4. Close the inner cover and the scan unit. Printing automatically resumes. If the paper does not eject, go to the next step. 3. Open the inner cover.SOLVING OTHER PROBLEMS 6. Pull the toner cartridge out. The following chart lists some troublesome conditions that may occur and the recommended solutions. Follow the suggested solutions until the problem is corrected. If the problem persists, contact a service representative. Other problems include: • See "Power problems" on page 81. • See "Printing problems" on page 82. • See "Copying problems" on page 83. • See "Scanning problems" on page 84. • See "Copying problems" and "Paper feeding problems" on page 81.CONDITION SUGGESTED SOLUTIONS Paper jams during printing. Clear the paper jam (See "Clearing paper jams" on page 78). Paper sticks together.Printing problems CONDITION The machine does not print. CONDITION POSSIBLE CAUSE SUGGESTED SOLUTIONS The machine is not receiving power. Check the power cord connections. The machine is not selected as the default machine. Select your machine as your default machine in your Windows.CONDITION POSSIBLE CAUSE SUGGESTED SOLUTIONS Printing quality problems If the inside of the machine is dirty or paper has been loaded improperly, there might be a reduction in print quality. See the table below to clear the problem. The machine prints, but the text is wrong, garbled, or incomplete. If you are in a DOS environment, the font setting for your machine may be set incorrectly. See "Changing font setting" on page 47. Pages print, but they are blank. CONDITION White Spots Vertical repetitive defects SUGGESTED SOLUTIONS CONDITION If white areas appear on the page • • If there are too rough and a lot of dirt from a paper falls to the inner devices within the machine, so the transfer roller may be dirty. Clean the inside of your machine (See "Cleaning the inside" on page 74). • The paper path may need cleaning. Clean the inside of your machine (See "Cleaning the inside" on page 74).CONDITION Ensure that the paper is loaded properly. Check the paper type and quality. Check the paper size setting. CONDITION If the machine prints out garbled code or unexpected characters, it might because of loose cable connections or a faulty cable. Reconnect the cable and check the condition of the cable. Disconnect the printer cable and reconnect. Try a print job that you have had printed successfully before.CONDITION POSSIBLE CAUSE SUGGESTED SOLUTIONS Smears, lines, marks, or spots appear on copies. Scanning problems SUGGESTED SOLUTION • Q • If the defects are on the original, adjust darkness to lighten the background of your copies using Printer Settings Utility (See "Changing the settings for each copy" on page 62). If there are no defects on the original, clean the scan unit (See "Cleaning the scan unit" on page 75). CONDITION The scanner does not work. SUGGESTED SOLUTIONS • • • Copy image is skewed.Common Windows problems CONDITION Common Linux problems CONDITION Common Macintosh problems CONDITION "File in Use" message appears during installation. Exit all software applications. Remove all software from the startup group, then restart Windows. Reinstall the printer driver. "General Protection Fault", "Exception OE", "Spool 32", or "Illegal Operation" messages appear. Close all other applications, reboot Windows and try printing again. "Fail To Print", "A printer timeout error occurred" messages appear.CONDITION I cannot scan via Gimp Front-end. Check if Gimp Front-end has Xsane: Device dialog. If not, should install Xsane plug-in for Gimp on the your computer. You can find Xsane plug-in for Gimp on Linux distribution CD or Gimp home page.supplies 13. This chapter provides information about purchasing supplies and maintenance parts available for your machine. This chapter includes: • • • How to purchase Available supplies • Available maintenance parts. The available accessories may differ from country to country. Contact your sales representatives to obtain the list of available accessories. To order Samsung-authorized supplies, accessories, and maintenance parts, contact your local Samsung dealer or the retailer where you purchased your machine.1. Turn the module off, then wait a few minutes for the module to turn off. 2. Open the scan unit. 4. Slowly shake the cartridge side to side five or six times to distribute the toner evenly inside the cartridge. It will ensure maximum copies per cartridge. 3. Open the inner cover. If toner gets on your clothing, wipe it off with a dry cloth and wash it in cold water. Hot water sets toner into fabric. Do not touch the drum (located at the bottom of the cartridge).specifications 14. This chapter guides you about this machine's technical specifications.
